What is Glogster?

Glogster is a website to make digital posters using pictures, videos, and text to create a sharable display.

Applications of Glogster

Students: make posters for presentations and assignments, share Glogs with other students and the instructor, add creative flair to a wiki, or embed a Glog on your portfolio page

Instructors: make creative assignments, design a webquest (an inquiry based lesson with assigned resources), create a visual display with embedded videos and pictures to present, or share ideas with the class in a new way

How to make a Glog:
1. Click on Create New Glog
   a. Templates are an easy way to get started.
   b. Use the Vertical and Horizontal pages to begin with a blank slate and add your own items.

2. Add items using the Tools button.
   a. Add text by clicking on the Text button, picking a style, and clicking Use It
   b. Add Graphics from Glogster by clicking the Graphics, then clicking Use it
   c. Upload images, audio, and video to your Glog by clicking on Image → Upload then choose the file you want to upload and click Use It.
   d. Want to use an image or video you found on the web? Use the link tool to paste the web address of the image or video you want to insert on the Glog.
   e. The grab button is used to take a picture or video using a web-camera. Grab can be added as an image, wall, page, audio, or video.
f. The wall is the background color or image behind the text, pictures, and objects added to your glog; whereas, the page is the color or image you can set for the border/side panels of the glog.

g. Add a video from YouTube by clicking on Video → Youtube. Search for the video or paste the web address. Then click the Use It button.

3. Editing and Moving items

a. Resize the item by using the arrows on the corners of the item

b. Rotate objects using the rounded arrows in the middle of each side of the item.

c. Change the color of an area by clicking the dropper icon, choosing the place where you would like to change color, and then select a color.

d. Link objects to a website by clicking on the link icon and pasting the URL of the Website.

e. Edit the text by either double clicking the text or click the Abl icon.

f. Use the wand icon to add a shadow, shadow color, or adjust transparency.

g. Send the item forward using the Bring to Front icon.

h. Send the item backward using the Send to Back icon.

i. Make a copy of the item by using the Duplicate button.

j. Undo the last action by using the Undo button.

k. Lock the picture to make sure that it does not move or resize by using the Lock button.

l. Delete the item by using the Garbage can button.

4. Saving and Sharing

a. Name the Glog and click save.

b. Then choose the Discipline and edit the URL of the Glog.

   i. Send the URL to others to view the Glog.

c. Click on the Privacy that is desired, then click on Finish Saving.
